Install Ulaunch Flash Disk Kingston

It worked fine yesterday and just now, when I plugged it into my computer it appears as 'Removable Disk F:' When I try to open it, a dialog box shows up.. But when I try to, another dialog box appears I was starting to get worried that I won't be able to use my USB anymore.. Kingston Flash So, I have a problem with my USB It worked fine yesterday and just now, when I plugged it into my computer it appears as 'Removable Disk F:' When I try to open it, a dialog box shows up.

Any help or suggestions to help me fix this is highly appreciated Thank you all.. I tried Changing Drive Letters and Paths But it didn't work I hope someone could help with my problem.. I watched videos on YouTube to help me fix it But I still can't I can't find any other ways to solve this problem and I'm really worried that I can't use my usb again.
